Journal of Organometallic Chemistry

Subject Index of Volume 500

Acyl complexes
Acyl complexes of molybdenum: structural and reactivity studies (L. Contreras, A. Pizzano, L. Sánchez and E. Carmona), 61
Alkali metals
Recent studies on metal and metalloid bis(trimethylsilyl)methyls and the transformation of the bis(trimethylsilyl)methyl into the azaallyl and β-diketinimato ligands (M.F. Lappert and D.-S. Liu), 203
Alkyl metal
Main Group and Group 11, 12, 2-pyridyl-(trimethylsilyl)methyl and -bis(trimethylsilyl)-methyl chemistry (T.R. Van den Ancker and C.L. Raston), 289
Alkynes
Some organometallic chemistry of ruthenium(II) (Y. Wakatsuki and H. Yamazaki), 349
Aluminium
Group 13 organometallic chalcogen derivatives: their structures and behavior in solution (J.P. Oliver), 269
New developments in the chemistry of organoaluminum and organogallium hydrides (A.H. Cowley, F.P. Gabbaï, H.S. Isom and A. Decken), 81
Aluminum
Forty years of *Umpolung* in organometallic chemistry: from carbanionic nucleophiles to metallic electrophiles (J.J. Eisch), 101
Antimony
Success and serendipity during studies aimed at preparing carbenerhodium(I) complexes (H. Werner), 331
Arene complexes
Aromatic hydrocarbons, carbocyclic ligands spanning several oxidation states in both Main Group and transition elements. Recent advances with early transition d elements (F. Calderazzo and G. Pampaloni), 47
Aryldiazeno
Thirty years of organometallic aryldiazenido arylazo derivatives (R.B. King), 187
Asymmetric syntheses
Versatile α-pinene-based borane reagents for asymmetric syntheses (H.C. Brown and P.V. Ramachandran), 1
Azaallyls
Recent studies on metal and metalloid bis(trimethylsilyl)methyls and the transformation of the bis(trimethylsilyl)methyl into the azaallyl and β-diketinimato ligands (M.F. Lappert and D.-S. Liu), 203

Bis(trimethylsilyl)methyls
Recent studies on metal and metalloid bis(trimethylsilyl)methyls and the transformation of the bis(trimethylsilyl)methyl into the azaallyl and β-diketinimato ligands (M.F. Lappert and D.-S. Liu), 203
Bonding
Essays on organometallic chemistry, VII. Laboratory curiosities of yesterday, catalysts of tomorrow: organometallic oxides (W.A. Herrmann), 149
Borane reagents
Versatile α-pinene-based borane reagents for asymmetric syntheses (H.C. Brown and P.V. Ramachandran), 1
Boron
Forty years of *Umpolung* in organometallic chemistry: from carbanionic nucleophiles to metallic electrophiles (J.J. Eisch), 101
Non-spectator behavior of carborane ligands in icosahedral metallacarboranes (P.A. Jelliss and F.G.A. Stone), 307
Versatile α-pinene-based borane reagents for asymmetric syntheses (H.C. Brown and P.V. Ramachandran), 1
Bulky phosphines
Complexes of gold(I) with polyaromatic phosphine ligands (D.M.P. Mingos and T.E. Müller), 251

Calcium
Recent progress in the chemistry of 1,3-diene complexes of niobium and tantalum (A. Nakamura and K. Mashima), 261
Carbanions
Forty years of *Umpolung* in organometallic chemistry: from carbanionic nucleophiles to metallic electrophiles (J.J. Eisch), 101
Carbene complexes
Success and serendipity during studies aimed at preparing carbenerhodium(I) complexes (H. Werner), 331
Carbonyl
Reflections on osmium and ruthenium carbonyl compounds (J. Lewis and P.R. Raithby), 227
Thirty years of organometallic aryldiazenido arylazo derivatives (R.B. King), 187
Carborane
Non-spectator behavior of carborane ligands in icosahedral metallacarboranes (P.A. Jelliss and F.G.A. Stone), 307
Catalysis
Comparison of the reactivities of neutral and cationic transition metal alkyls and hydrides (A. Yamamoto), 337
Essays on organometallic chemistry, VII. Laboratory curiosities of yesterday, catalysts of tomorrow: organometallic oxides (W.A. Herrmann), 149
Some aspects of organosilicon and ferrocene chemistry (M. Kumada), 195
Some organometallic chemistry of ruthenium(II) (Y. Wakatsuki and H. Yamazaki), 349
Transition metal-catalysed organic reactions promoted by chelating or metallacycle-forming substrates (M. Catellani, G.P. Chiusoli and M. Costa), 69
Cationic complexes
Comparison of the reactivities of neutral and cationic transition metal alkyls and hydrides (A. Yamamoto), 337
C–C coupling
The lively chemistry of the di-μ-methylene-bis(pentamethylcyclopentadienyl-rhodium) complexes, analogues of surface reactions in heterogeneous catalysis (P.M. Maitlis), 239

Chalcogens
Group 13 organometallic chalcogen derivatives: their structures and behavior in solution (J.P. Oliver), 269
C–H · · · π interaction
Complexes of gold(I) with polyaromatic phosphine ligands (D.M.P. Mingos and T.E. Müller), 251
Chromium
Thirty years of organometallic aryldiazenido arylazo derivatives (R.B. King), 187
Cluster
Reflections on osmium and ruthenium carbonyl compounds (J. Lewis and P.R. Raithby), 227
Cobalt
Transition metal-catalysed organic reactions promoted by chelating or metallacycle-forming substrates (M. Catellani, G.P. Chiusoli and M. Costa), 69
Covalent bond classification
A new approach to the formal classification of covalent compounds of the elements (M.L.H. Green), 127
Crystal structure
Some organometallic chemistry of ruthenium(II) (Y. Wakatsuki and H. Yamazaki), 349
Crystal structures
Recent studies on metal and metalloid bis(trimethylsilyl)methyls and the transformation of the bis(trimethylsilyl)methyl into the azaallyl and β-diketinimato ligands (M.F. Lappert and D.-S. Liu), 203
Cyclopentadienyl
Hydrogen elimination in cyclopentadienylnickel compounds as a route to organonickel and organic compounds (S. Pasynkiewicz), 283
The lively chemistry of the di-μ-methylene-bis(pentamethylcyclopentadienyl-rhodium) complexes, analogues of surface reactions in heterogeneous catalysis (P.M. Maitlis), 239
Cyclopropene
The organometallic chemistry of nitrogenases (G.J. Leigh and C.N. McMahon), 219

Dendrizymes
Dendrizymes: Expanded ligands for enantioselective catalysis (H. Brunner), 39
β-Diketinimates
Recent studies on metal and metalloid bis(trimethylsilyl)methyls and the transformation of the bis(trimethylsilyl)methyl into the azaallyl and β-diketinimato ligands (M.F. Lappert and D.-S. Liu), 203
Dinitrogen fixation
Dinitrogen fixation and activation after 30 years: a puzzle still unsolved (S. Gambarotta), 117

Enantioselective catalysis
Dendrizymes: Expanded ligands for enantioselective catalysis (H. Brunner), 39
Ethyne
Complexes of gold(I) with polyaromatic phosphine ligands (D.M.P. Mingos and T.E. Müller), 251
Expanded ligands
Dendrizymes: Expanded ligands for enantioselective catalysis (H. Brunner), 39

Ferrocene
Some aspects of organosilicon and ferrocene chemistry (M. Kumada), 195
Fischer–Tropsch
The lively chemistry of the di-μ-methylene-bis(pentamethylcyclopentadienyl-rhodium) complexes, analogues of surface reactions in heterogeneous catalysis (P.M. Maitlis), 239
Fluxionality
Group 13 organometallic chalcogen derivatives: their structures and behavior in solution (J.P. Oliver), 269

Gallium
Forty years of *Umpolung* in organometallic chemistry: from carbanionic nucleophiles to metallic electrophiles (J.J. Eisch), 101
Group 13 organometallic chalcogen derivatives: their structures and behavior in solution (J.P. Oliver), 269
New developments in the chemistry of organoaluminum and organogallium hydrides (A.H. Cowley, F.P. Gabbaï, H.S. Isom and A. Decken), 81
Germanium
Cyclopentadienyl compounds with nitrogen donors in the side-chain (P. Jutzi and U. Siemeling), 175
Group 1, 2, 11–15
Main Group and Group 11, 12, 2-pyridyl-(trimethylsilyl)methyl and -bis(trimethylsilyl)-methyl chemistry (T.R. Van den Ancker and C.L. Raston), 289
Group 13
Group 13 organometallic chalcogen derivatives: their structures and behavior in solution (J.P. Oliver), 269

Heterogenous catalysis
The lively chemistry of the di-μ-methylene-bis(pentamethylcyclopentadienyl-rhodium) complexes, analogues of surface reactions in heterogeneous catalysis (P.M. Maitlis), 239
Hydrides
Comparison of the reactivities of neutral and cationic transition metal alkyls and hydrides (A. Yamamoto), 337
New developments in the chemistry of organoaluminum and organogallium hydrides (A.H. Cowley, F.P. Gabbaï, H.S. Isom and A. Decken), 81
Hydrogen bond
Complexes of gold(I) with polyaromatic phosphine ligands (D.M.P. Mingos and T.E. Müller), 251
Hydrogen-elimination
Hydrogen elimination in cyclopentadienylnickel compounds as a route to organonickel and organic compounds (S. Pasynkiewicz), 283

Indium
Group 13 organometallic chalcogen derivatives: their structures and behavior in solution (J.P. Oliver), 269
Insertion reactions
Comparison of the reactivities of neutral and cationic transition metal alkyls and hydrides (A. Yamamoto), 337
Reactivity of the metal–silicon bond in organometallic chemistry (P. Braunstein and M. Knorr), 21
Iron
Some aspects of organosilicon and ferrocene chemistry (M. Kumada), 195
The organometallic chemistry of nitrogenases (G.J. Leigh and C.N. McMahon), 219

Lanthanides
Recent progress in the chemistry of 1,3-diene complexes of niobium and tantalum (A. Nakamura and K. Mashima), 261
Recent studies on metal and metalloid bis(trimethylsilyl)methyls and the transformation of the bis(trimethylsilyl)methyl into the azaallyl and β-diketinimato ligands (M.F. Lappert and D.-S. Liu), 203
Lanthanum
Recent progress in the chemistry of 1,3-diene complexes of niobium and tantalum (A. Nakamura and K. Mashima), 261

Magnesium
Cyclopentadienyl compounds with nitrogen donors in the side-chain (P. Jutzi and U. Siemeling), 175
Main Group
Main Group and Group 11, 12, 2-pyridyl-(trimethylsilyl)methyl and -bis(trimethylsilyl)-methyl chemistry (T.R. Van den Ancker and C.L. Raston), 289
Manganese
Optically active organometallic compounds (a personal account from the inside) (V.I. Sokolov), 299
Thirty years of organometallic aryldiazenido arylazo derivatives (R.B. King), 187
Mechanism
Forty years of *Umpolung* in organometallic chemistry: from carbanionic nucleophiles to metallic electrophiles (J.J. Eisch), 101
Mercury
Optically active organometallic compounds (a personal account from the inside) (V.I. Sokolov), 299
Metallacarboranes
Non-spectator behavior of carborane ligands in icosahedral metallacarboranes (P.A. Jelliss and F.G.A. Stone), 307
Metallacycles
Transition metal-catalysed organic reactions promoted by chelating or metallacycle-forming substrates (M. Catellani, G.P. Chiusoli and M. Costa), 69
Metallocenes
Optically active organometallic compounds (a personal account from the inside) (V.I. Sokolov), 299
Metal oxides
Essays on organometallic chemistry, VII. Laboratory curiosities of yesterday, catalysts of tomorrow: organometallic oxides (W.A. Herrmann), 149
Metal–Silicon bonds
Reactivity of the metal–silicon bond in organometallic chemistry (P. Braunstein and M. Knorr), 21
Methylene
The lively chemistry of the di-μ-methylene-bis(pentamethylcyclopentadienyl-rhodium) complexes, analogues of surface reactions in heterogeneous catalysis (P.M. Maitlis), 239
Migration reactions
Reactivity of the metal–silicon bond in organometallic chemistry (P. Braunstein and M. Knorr), 21
MO calculations
Some organometallic chemistry of ruthenium(II) (Y. Wakatsuki and H. Yamazaki), 349
Molybdenum
A new approach to the formal classification of covalent compounds of the elements (M.L.H. Green), 127
Acyl complexes of molybdenum: structural and reactivity studies (L. Contreras, A. Pizzano, L. Sánchez and E. Carmona), 61
The organometallic chemistry of nitrogenases (G.J. Leigh and C.N. McMahon), 219
Thirty years of organometallic aryldiazenido arylazo derivatives (R.B. King), 187

N-functionalised alkyl
Main Group and Group 11, 12, 2-pyridyl-(trimethylsilyl)methyl and -bis(trimethylsilyl)-methyl chemistry (T.R. Van den Ancker and C.L. Raston), 289
N-functionalised cyclopentadienyl
Cyclopentadienyl compounds with nitrogen donors in the side-chain (P. Jutzi and U. Siemeling), 175
Nickel
Hydrogen elimination in cyclopentadienylnickel compounds as a route to organonickel and organic compounds (S. Pasynkiewicz), 283
Niobium
Aromatic hydrocarbons, carbocyclic ligands spanning several oxidation states in both Main Group and transition elements. Recent advances with early transition d elements (F. Calderazzo and G. Pampaloni), 47
Dinitrogen fixation and activation after 30 years: a puzzle still unsolved (S. Gambarotta), 117
Recent progress in the chemistry of 1,3-diene complexes of niobium and tantalum (A. Nakamura and K. Mashima), 261
Nitrogenases
The organometallic chemistry of nitrogenases (G.J. Leigh and C.N. McMahon), 219
N-pyridylalkyl
Main Group and Group 11, 12, 2-pyridyl-(trimethylsilyl)methyl and -bis(trimethylsilyl)-methyl chemistry (T.R. Van den Ancker and C.L. Raston), 289

Olefins
Some organometallic chemistry of ruthenium(II) (Y. Wakatsuki and H. Yamazaki), 349
Osmium
Reflections on osmium and ruthenium carbonyl compounds (J. Lewis and P.R. Raithby), 227

Palladium
Comparison of the reactivities of neutral and cationic transition metal alkyls and hydrides (A. Yamamoto), 337
Optically active organometallic compounds (a personal account from the inside) (V.I. Sokolov), 299
Transition metal-catalysed organic reactions promoted by chelating or metallacycle-forming substrates (M. Catellani, G.P. Chiusoli and M. Costa), 69
Pentamethyl
The lively chemistry of the di-μ-methylene-bis(pentamethylcyclopentadienyl-rhodium) complexes, analogues of surface reactions in heterogeneous catalysis (P.M. Maitlis), 239
α-Pinene
Versatile α-pinene-based borane reagents for asymmetric syntheses (H.C. Brown and P.V. Ramachandran), 1
Platinum
Comparison of the reactivities of neutral and cationic transition metal alkyls and hydrides (A. Yamamoto), 337

Reaction mechanism
Hydrogen elimination in cyclopentadienylnickel compounds as a route to organonickel and organic compounds (S. Pasynkiewicz), 283
Reactivity
Acyl complexes of molybdenum: structural and reactivity studies (L. Contreras, A. Pizzano, L. Sánchez and E. Carmona), 61
Rhenium
Essays on organometallic chemistry, VII. Laboratory curiosities of yesterday, catalysts of tomorrow: organometallic oxides (W.A. Herrmann), 149
Rhodium
Cyclopentadienyl compounds with nitrogen donors in the side-chain (P. Jutzi and U. Siemeling), 175
Success and serendipity during studies aimed at preparing carbenerhodium(I) complexes (H. Werner), 331
The lively chemistry of the di-μ-methylene-bis(pentamethylcyclopentadienyl-rhodium) complexes, analogues of surface reactions in heterogeneous catalysis (P.M. Maitlis), 239
Transition metal-catalysed organic reactions promoted by chelating or metallacycle-forming substrates (M. Catellani, G.P. Chiusoli and M. Costa), 69

Ruthenium
Optically active organometallic compounds (a personal account from the inside) (V.I. Sokolov), 299
Reflections on osmium and ruthenium carbonyl compounds (J. Lewis and P.R. Raithby), 227
Some organometallic chemistry of ruthenium(II) (Y. Wakatsuki and H. Yamazaki), 349

Silanones
From ephemers to monomers, oligomers and polymers. New methods for the generation and transformation of silanones (M.G. Voronkov and S.V. Basenko), 325
Silicon
From ephemers to monomers, oligomers and polymers. New methods for the generation and transformation of silanones (M.G. Voronkov and S.V. Basenko), 325
Reactivity of the metal–silicon bond in organometallic chemistry (P. Braunstein and M. Knorr), 21
Recent studies on metal and metalloid bis(trimethylsilyl)methyls and the transformation of the bis(trimethylsilyl)methyl into the azaallyl and β-diketinimato ligands (M.F. Lappert and D.-S. Liu), 203
Some aspects of organosilicon and ferrocene chemistry (M. Kumada), 195
Silicon, Groups 1–3
Synthesis, structure and reactions of organometallic compounds of Groups 1–3 containing bulky silicon-substituted alkyl groups (C. Eaborn, K. Izod and J.D. Smith), 89
Stibanes
Success and serendipity during studies aimed at preparing carbenerhodium(I) complexes (H. Werner), 331
Strontium
Recent progress in the chemistry of 1,3-diene complexes of niobium and tantalum (A. Nakamura and K. Mashima), 261
Structure
Acyl complexes of molybdenum: structural and reactivity studies (L. Contreras, A. Pizzano, L. Sánchez and E. Carmona), 61
Essays on organometallic chemistry, VII. Laboratory curiosities of yesterday, catalysts of tomorrow: organometallic oxides (W.A. Herrmann), 149
Synthesis
Essays on organometallic chemistry, VII. Laboratory curiosities of yesterday, catalysts of tomorrow: organometallic oxides (W.A. Herrmann), 149

Tantalum
Dinitrogen fixation and activation after 30 years: a puzzle still unsolved (S. Gambarotta), 117
Recent progress in the chemistry of 1,3-diene complexes of niobium and tantalum (A. Nakamura and K. Mashima), 261
Titanium
Cyclopentadienyl compounds with nitrogen donors in the side-chain (P. Jutzi and U. Siemeling), 175
Dinitrogen fixation and activation after 30 years: a puzzle still unsolved (S. Gambarotta), 117
The organometallic chemistry of nitrogenases (G.J. Leigh and C.N. McMahon), 219
Tolman cone angles
Complexes of gold(I) with polyaromatic phosphine ligands (D.M.P. Mingos and T.E. Müller), 251
Transition metal complexes
Dendrizymes: Expanded ligands for enantioselective catalysis (H. Brunner), 39
Transition metals
Aromatic hydrocarbons, carbocyclic ligands spanning several oxidation states in both Main Group and transition elements. Recent advances with early transition d elements (F. Calderazzo and G. Pampaloni), 47
Trimethylsilylmethyl
Main Group and Group 11, 12, 2-pyridyl-(trimethylsilyl)methyl and -bis(trimethylsilyl)-methyl chemistry (T.R. Van den Ancker and C.L. Raston), 289
Tris(trimethylsilyl)methyl
Synthesis, structure and reactions of organometallic compounds of Groups 1–3 containing bulky silicon-substituted alkyl groups (C. Eaborn, K. Izod and J.D. Smith), 89
Tungsten
Thirty years of organometallic aryldiazenido arylazo derivatives (R.B. King), 187

Vanadium
Aromatic hydrocarbons, carbocyclic ligands spanning several oxidation states in both Main Group and transition elements. Recent advances with early transition d elements (F. Calderazzo and G. Pampaloni), 47
Dinitrogen fixation and activation after 30 years: a puzzle still unsolved (S. Gambarotta), 117
The organometallic chemistry of nitrogenases (G.J. Leigh and C.N. McMahon), 219
Variable temperature NMR
Complexes of gold(I) with polyaromatic phosphine ligands (D.M.P. Mingos and T.E. Müller), 251

Ziegler–Natta catalysis
Forty years of *Umpolung* in organometallic chemistry: from carbanionic nucleophiles to metallic electrophiles (J.J. Eisch), 101
Zirconium
Cyclopentadienyl compounds with nitrogen donors in the side-chain (P. Jutzi and U. Siemeling), 175
Dinitrogen fixation and activation after 30 years: a puzzle still unsolved (S. Gambarotta), 117
